**Harris Survey Finds a Plurality
In Favor of President's Removal**

By United Press International

The Harris Survey said yesterday that "by 43 to 41 per cent, a narrow plurality of the American people is now prepared to agree that President Nixon should be impeached by Congress and removed from office, while 16 per cent are unsure."

The poll, conducted by Louis Harris & Associates, Inc., is the first to record a popular margin in favor of Congress's removing Mr. Nixon from the Presidency, Mr. Harris said.

The results came from interviews conducted between March 24 and 29 in 1,495 households that Mr. Harris described as a national cross section. They show that "it is fair to conclude that the American

people now want the full procedures of the Constitution regarding impeachment to be invoked against President Nixon," Mr. Harris said.

"A clear majority agrees, by 55 to 33 per cent, with the statement that if President Nixon fails to turn over the information the House Judiciary Committee wants, then that committee should vote to bring impeachment charges against the President," Mr. Harris said.

"A substantial number, 67 to 19 per cent, do not expect the President to turn over all the evidence the committee wants from him. And the public gives him overwhelmingly negative marks, 72 to 21 per cent, on the way he is cooperating with the impeachment proceedings."
