## Doar's

## Decision

SFChronicle  
Washington

John M. Doar, the House Judiciary Committee's special counsel, is planning to urge the committee late this week to conclude that it has no choice but to recommend the impeachment of President Nixon.

Senior committee members said yesterday that Doar, who until now has abstained from offering any characterization of impeachment evidence, would argue forcefully and in detail that the evidence should compel a Senate trial of the President.
