

3/16 Dear J & J, large mailing with clips arrived as I'm preparing for trip to NYC and scheduled "debate" with Foreman. I'm a bit slowed down with a sprained foot (of which I'd never heard before) and have a large chore of dubbing interview tapes for transcribing, so I merely acknowledge, will respond on return. Tapes: I can use any speed 1 7/8 to 7 1/2 but cassettes are easiest to transcribe and more convenient to store and hear. I have a once-good (before feeb treatment) machine I can still use and have gotten a new one I'll be selling as soon as this transcribing is done. I'm going to have to get a miniminerature for travelling and interviewing for ease in carrying. I'm getting too tired for the 35-lb attache case, which is what it weighs when I'm travelling, and I want one I can hide so that people will not ham it up when I interview them...Good to hear from Hal. If he calls again, ask him if he has the time to get the O in NOs back. If he does, I'll send all he needs for the trucking co. I won't be surprised if Foreman has a sudden court appearance that will keep him from NYV when he reads the book, which has been sent to him...I expect to go to both Wide World and UPI on pix. One of those you sent, if cropped, is identically one I'm looking for. The other has values you missed, which I'll explain later, and adds to what I'd already found but can't get. The two papers supply HPI and AP with their Memphis services. The morgue of one has been robbed already...I do send you (carbons) for your information, but should you ever want to keep any, unless I make it for return, it is an extra. Thanks H
