

Add notes on Today/Drs.: there were two,  
one, the one I quoted being Paul Dudley  
White, the second one unknown to me  
named Diamond. Lil found it interesting.  
They saw Dr. Haten, found him in good  
shape (do you know him-he also made the  
march), quote him as having either cleared  
China of venereal disease or reporting it  
entirely cleared of them.
