

Lamia deal or begins to deal with
Tai Li and his Secret police and the
way he ran it, his deals with the
Jap. on opium, etc., on 86. I do not
know if this interests you or if you
already know more than it says. But
if you are interested, suggest
checking Marboro out there because
the cost of copying is greater than
that of the book. If you can't get
there or by mail, I'll ask the friend
who got this for me or I'll lend you
this copy when I've finished. I am
at the beginning of this part, so
aside from know knowing enough about
any asked or what you know, I can't
evaluate dependability of what is
presented as fact. I am reasonably
confident it is information deV did
not develop himself, that he was told
by CIA or found it in French
government files later in his life.
