

Dear Harold:

In returning the attached clip and note on the Dominican invasion, can only say that we have no recollection now of any angle that might have suggested Hunt's involvement, except, of course, the insane nature of the whole affair. Like you, we had fairly solid files on it at one time, but we're not sure we kept them. If we did, they're probably in the basement, and the first time we're into that rat's nest we'll take a look for the Dominican episode and see if anything suggests our friend. It is precisely the likelihood that he could have been mixed up in anything of that nature anywhere in Latin America that led us to send you that clipping about Howard Edwards, the guy who was jailed in Chile during the Allende-ITT et al feud. We didn't think Edwards was Hunt, but did think it possible he had some connection.

We have your 90, 91 and 3c V, all containing much interesting stuff. Thanks especially for the long Chitrib thing on Peking Man. Presumably this came from LF, whom I hope you'll remember to thank for us when next you write to him. With the liaison offices being established in Peking and WX, and with frozen assets about to be thawed along with everything else, it may be that Mr. Janus is nearing a climax in his sluething, and we could learn of a momentous discovery in somebody's basement almost any day now.

Best,
