

Animal lovers: fished a skunk and a cardinal out of the pool within two hours of each other - in daylight. Can you top that on your mountain? We never knew or I didn't know that cats carry poison. We had a many as 28 at a time when we farmed, fondled them all, treated all the ill, poison abounded, and enither ever got it. So, I at least thought it rare. And were it going to happen to you, it would bu now. I hope! est,
