

Files Ripoff HW 7/19/74

Hearing the NPR account of the bill of particulars presented to the House Judiciary Committee (about 6 p.m.) reminds me of another ^{set} of WG documents that were with those who absence I discovered only when I needed them.

I had a pretty good collection of ITT stuff. There were "Dear Ted" letters, "Dear Hal" letters, and an assortment of White House and ITT memos and letters. Some Mitchells.

The ITT DC office was on a first-name basis with almost everyone.

There were ITT internal memos, too.

These were all xeroxes, but not remote generation. All were quite clear, better quality than needed for reproduction.

And to the best of my knowledge, not one had been used. Anywhere, any way.

It seems that, as it should, the Judiciary committee has them.

Many people were quoted, in the White House, D.J., etc.

I am not now certain of my source but I believe it was the beneficiary of a leak who was without the courage to use them.
