

The recognized plural for UFO is UFOs, no apostrophe. The Sun appears to have either more apostrophes than it knows what to do with or an editor who was overawed as a child by signs such as GOOD EAT'S, or FLAT'S FIXED, or SAW'S SHARPENED. (May even have had to wear Levi's).

Best thing I've read on the subject to which I've been neither close nor insensitive. Well done. I've filed with Alvarez, who has this kind of a career. Even on Codename Jason, not just CBS, about which there is an enclosure or was in last mailing. Getting too tired to remember. Best HW 12/13/75
