Dear Howard,

3/14/79

Your Memorendum in the spectro appeal is a fine piece of wrok in every way. I like it even more on reading it then did on hearing it over the phone.

I's also glad yourded the last sentence to the first graf to suggest at the outset that the court can enlarge the record, include the new natural without remend.

The issue is not coint to go away. I'm proparing more for other cases, all dated in nowness and all essential to any fair decision.

It impressed me that you were able to avoid legal jargon while saying it all legalese. It is fine, succinct, lecid and persusaive writing.

I do have more from what the college women working on the records are finding. And dating as they find. I'm finding more as I got over the Sections and then I date it.

And your idl is conving like and!

Wait until youse some of it, CIA and FRI both.

If there is the oral argument on the 20th both women want to be there so I have a rife and do not have to depend on the restrictine bus return schedule. I'll have a package for you then.

If they delay it, as Jim thicks can happen by returning to district court, unless there is purpose in my going in I'll sail it,

"rogress on the Fel's JFK files is fine. All are integrated, all in clearly identified files folders through all FETHQ releases except the bulkys. Helf of the Dallas bulkys are filed this way. I have then next because they are now important and such more voluminous. They will be followed by FETHQ bulkys, about 15,000 pages. Then the field office files, which require only moving because I did them all as I read than.

Or, access will from now on be much easier.

As I go through each Section I'm phown a record in I'm making copies of many for subject filing and to this moment have all of them filed. his is a deparate file that, with help, I'll be able to keep in better shape. Once all the major filing is done I'm having this women make me a card file on all subjects. Then I can mark each capy without having to leave the office and can all subjects as needed, with only filing to be done in the cellar.

Many cabinets as I had down there is isolear I'll need more moon. Or havan't you meen them? (Still 9 2-ft. cartons to capty, FM alone.)

"any thanks. Hope we can get together Tuesday, which would mean and argument.

JDW: I'm so proud! ... Thursday afternoon, with

JL to leave town Friday, the court of appeals called and said they want memos by the 16th
on our effort to enlarge the record before it to include what the crooked FBI withheld that
I nonetheless got after district coirt ruled against me. Jim is not returning until the
day after the memo was due. All he could do is ask Howard to pitch in. Howard has a full-time
plus job with a major law firm. So all he could do is say that he'd work on getting ready
Saturday, draft it Sunday, get it retyped onday and have it filed by another before he
also had to leave town on his work on Tuesday. So aside from the time pressure he had
the great liabilitym of getting into a case with no time, little knowledge of its long
record, and filing in the name of another. What a superb bit of thinking, witting and
research for case citation under any circumstances, much more under these. Best HW 3/14/79
