10 Quizzed In Florida JFK Probe

Links With Dead Man

PENSACOLA (Fla.) — (AP) — Escambia County Solicitor Carl Harper said he questioned 10 persons yesterday in an effort to pinpoint circumstances of a death which, according to a relative, may have been linked to President Kennedy's 1963 assassination. Harper obtained depositions from policemen, nurses and others who had contact with Thomas Henry Killam, whose body was found March 17, 1964, beside a shattered store window here.

More witnesses will be quizzed, Harper said.

He said he also plans to consult medical experts about the prospect of obtaining useful evidence if Killam's body is exhumed.

Relatives told authorities Killam was acquainted with persons who knew Lee Oswald, the President's accused slayer, and Jack Ruby, who shot Oswald.

At the time of Killam's death, police called it probable suicide and the coroner called it accidental. He was believed to have fallen or jumped through the window.
