A Refugee Writes

Editor — As a childhood refugee from nazism I am most sensitive to racist opposition to humanitarian aid. However, victims of fascism are appalled to be categorized by President Ford with Phoenix program assassins, ARVN deserters, corrupt officials, war profiteers, heroin dealers and prostitutes arriving with gold and jewelry while American taxpayers pay for transportation and support. Undoubtedly there are honest frightened people needing assistance. But Senator McGovern's suggestion to facilitate repatriation for those wishing to return after the initial panic has passed must be seriously undertaken, preferably by U.N. agencies.
