By VICTOR LUSINCHI

Special to The New York Times GENEVA, March 30-In an unexpected turnabout, the Soviet Union announced a concession at the disarmament conference here today that could lead to an early agreement on an international convention banning biological weapons.

Against the background of the opening of the 24th Communist party Congress in Moscow-where Leonid I. Brezhnev, the Soviet leader, stressed his

country's peaceful intentions-Aleksei A. Roshchin, the Soviet delegate, introduced a draft agreement reflecting Moscow's conciliatory mood.

The draft dropped Moscow's insistence on the outlawing of bacteriological and chemical weapons at the same time. Mr. Roschin said the new proposal aimed "to completely exclude any possibility" of waging bacteriological warfare.

Mr. Roshchin told the delegates that the Soviet proposal was intended to break a twoyear deadlock on banning biological and chemical weapons caused by what he charged was Western unwillingness to give up chemical weapons.

In the first of its 14 articles, the Soviet draft treaty would bind nations "not to develop, produce, stockpile or otherwise acquire" microbiological or microbiological other biological agents or tox-ins "not designed for the prevention of disease or for other peaceful purposes."

'An Important Step'

As delegates filed out of the big United Nations conference room overlooking Lake Geneva, James F. Leonard, the head of the United States delegation, told reporters that the move represented an "important step forward in our negotiations."

The United States negotiator recalled the Western view that a convention on bacteriological weapons offered the conference the "greatest opportunity for a really concrete and definite step forward" now, while it continued its efforts to get another agreement to ban chemical weapons.

Mr. Leonard indicated that he saw no major difference between the Soviet draft on biological weapons and one proposed by Britain two years ago with United States backing. In reply to a question, he said that it was possible to "look forward to achieving an agreement in the relatively near future."

British The delegation. through a spokesman, also 'welcomed" the Soviet move,
