Nixon

9 Jun 74

1913<sup>\*</sup> is given as date Nixon was born by NYTimes Encyclopedia and AP Almanac.

From Betty Beale column:

Good-looking Jeanne Avery, who has taken up astrology in a big way because "it's mind-blowing when I can predict the hour things actually happen," was also on hand from California and claimed Washington is more interested in astrology than L.A.

After reworking Richard Nixon's chart when she learned he was born at 9:44 p.m. instead of 9:14 p.m. on Jan. 9, 1912, she said she doesn't see him out of office until July 1975. But because of him there will be a sudden and drastic effect on the country's image on Aug. 11 . . . So there you are if you believe in that sort of thing.
