## Reds Told To Take

### GIs Alive

SFXaminer

SAIGON — (CDN) — The only "good" American is a live one, Communist soldiers in South Vietnam are being told.

They are so valuable that "one live American is worth 30 dead ones," a recently captured Communist battlefield document says.

If it were not for the captured pilots and GIs, the document reasons, the United States would have no incentive to negotiate.

As a result, North Vietnamese and Viet Cong troops are being instructed to protect American POWs with their own lives, if necessary.

Allied intelligence sources made the document available.
