Summer Solstice

Muzzle detail - note bulge  
around barrel. This bulge  
scats snugly in bushing.  
Protruding rod is recoil  
spring guide.

OUTERS  
GUNSTICK

**DYE MARKER DART**

This dart is loaded with a non-toxic ura-  
nine dye - a bright yellow fluorescent  
color. It can be loaded with various liquids  
such as special stench liquids or vomit in-  
ducers on special military requests.

The uses of such a projectile are to mark or  
identify individuals in a crowd where contact  
and arrest are impractical. It has the effect  
of destroying anonymity.

**HYPODERMIC SYRINGE PROJECTILE**

Hypodermic syringes in dart form for animal control is a  
proved, practical, humane practice. This projectile can accurately  
deliver and inject a 1cc dose into unapproachable animals.

Pressurized ampules are available for loading by veterinarians.  
The serum is injected by compressed air behind a piston  
after the needle has come to rest in flesh. The dart's  
superb accuracy is a considerable factor in its usefulness.

**TRAINING DART**

This projectile is provided in similar weight and balance to  
the various "line" darts to give a similar trajectory pattern  
so that the trainee can get the feel of the gun without expend-  
ing expensive rounds. It can be fired indefinitely at "soft"  
targets - a mat or pad is suggested as a backstop for training.

**TEAR GAS DART**

This dart is designed to carry 2.5cc of liquid  
tear gas that covers an area of 12" to 15"  
in diameter. It has a safety spring clip. The  
clip is withdrawn on loading, making the  
projectile ready for firing.

The tear gas is extremely effective when  
applied to the person even if the hit is not  
in the direct area of the eyes. It's practi-  
cal to shoot at ranges from 10 to 50 yards.
