THE BIG LIE

You may think the U.S. meddles in foreign lands to bring freedom. The idea is entirely false. The U.S. hatches dictatorships all over the "free world." Not for nothing did the great historian, Arnold Toynbee, call the U.S. "the bully of the world."

13 Latin American nations went from democracy to dictatorship with the help of U.S. billions under the Alliance for Progress. Dictatorship was the price for U.S. aid.

The elected Arbenz was removed by a military dictator in Guatemala to please a fruit company. The elected Mossedegh suffered a like fate in Iran to please oil interests. After years of such efforts over 85% of the "free world" is run by dictators. Not one dictatorship was changed to democracy through U.S. efforts. It seems to me the CIA function is to subvert democracy and install tyrannies. Hundreds of foreign army officers from dictatorships are trained here without charge. Munitions go gratis and billions, too, to people like the colonels in Greece, the Generals in Brazil & Argentina, the Fascists who rule in Spain & Portugal. Even Duvalier in Haiti got his share. From Diem to Thieu its been one U.S. approved dictator after another.

To say the U.S. to-day is a beacon of freedom is one great big colossal lie. 1972 is not 1776. Nixon is not Washington.
