Mr. Clark, in the earlier interview, said that the divisions in the Justice Department were being inundated with memorandums from the Federal Bureau of Investigation. But he said in the interview, "There can be no question that the military knew that I would vehemently oppose any use of military pople to collect infor-mation." Besides, he added, "It never occurred to me that military intelligence could tell us anything that could be helpful."

In the wake of the racial riots in Newark and Detroit in the summer of 1967, and the antiwar march on the Pentagon that fall, Mr. Clarke warned the White House group that urban guerrilla warfare might break out, the sources said.

His remarks, reflecting the tension of the time, expressed thoughts similar to those of Maj. Gen. William P. Yarborough, the Army's chief intelligence officer. General Yarborough said elsewhere that for-eign subversive influences could be expected to be felt in the highly explosive situation foreseen for the summer of 1968.
