WASHINGTON GIVES ITS BLESSING

# verdict: Status quo for CIA l'he

OP OFFICIALDOM in Washington has decided to do nothing about the Cen-tral Intelligence Agency precisely because it approves of what the CIA has done and is doing. In the wake of the sensa-tional disclosures that the CIA has been funding the activities of a vast assortment ortment of private liberal organizations, the maof private interal organizations, the ma-jor concern of the Johnson Administra-tion and the Republican leagership, judg-ing from public statements, is to make sure that the CIA avoids future disclo-sures and unpleasant publicity.

The likelihood of passage of legislation that would harness the spy agency, according to most Washington sources, does not exist. The last time a move was made in Congress to put the agency under greater surveillance-one year ago-it was defeated overwhelmingly. There is

no indication, despite the latest revela-tions, that either House has changed its mind Only a handful of liberal congressmen

seemed to disagree with Sen. Henry Jack-son (D-Wash.), who told a television audience Feb. 26 that "it's fine to talk of free and voluntary groups, but this is a bare-knuckled operation, without kid gloves."

WHAT THE PUBLIC feels about the business is not known. No one consulted the public in the first place and no one appears to be consulting it now. The most likely outcome of the disclosure, first made public by Ramparts maga-zine, is that some CIA subsidies will be discontinued-at least to those organi-zations which have been revealed as recipients. The full extent of secret govern-

ment subsidies to purportedly private in-stitutions may never be known. The entire affair has obviously hurt the U.S. overseas, even if domestic reac-tion is muffled. The New York Times commented editorially Feb. 27 that "the integrity of all overseas activities by American student, scientific, labor and obuveh correspondence bas been nut tune American student, scientific, infor and church organizations has been put un-der a cloud by the impossibility of de-termining what the outer limits of CIA penetration are—or, indeed, whether there are any outer limits."

And they diminish the influence of those who have been pressing Hanol for more than a year to "make a gesture that would test John-son's sincerity." It is difficult for even the greatest skeptics in Hanol to believe that Washington's thinking can be as primitive as was indicated by Defense Secretary McNamara's statement in de-fense of the resumption of bombing, an official reaction to Hanol's offer of talks if the bombine ends. IF WASHINGTON thinks that Hanoi's offer was made from a position of weak-ness and therefore a bit more escalation will bring North Vietnam to its knees, it is making an enormous mistake, a mis-

# **Report to Readers: Death and intrigue in New Orleans**

N RESPONSE TO A REPORTER's comment that a statement of his was "bizarre," Mark Lane once said that the most bizarre thing about the assassina-tion of President Kennedy was the assassination it-self. In this context, the events in New Orleans in sen. In this context, the events in New Orleans in the last weeks, as they concern the assassinations of Kennedy and Lee Harvey Oswald, fall into place. And when they are examined, they are found to be not blazarre, but ominous—both because of their content and implications and because of the efforts of the press, federal investigatory agencies and Warren Com-mission counsel to deride and denigrate them. What emerges from the confusing newspaper stories are the following facts:

• Another mysterious death has been added to the long list of mysterious deaths of persons involved in one way or another in the assassination inquiry.

• There is considerable evidence of the complicity

of exiled anti-Castro Cubans in the murky details of the events surrounding the assassination. • The newspapers of New Orleans acted in a most irresponsible fashion to hamper the investigation of District Attorney Jim Garrison.

• The government of the United States has barred access to valuable information on a possible New Orleans link to the assassination by classifying as secret facts gathered during the investigation.

There is an unyielding determination by all those who compiled the Warren Commission Report to defend at all costs the single-murderer theory and to cast doubt on the reliability of anyone who seeks to prove that the murderer or murderers may still be among the second second second second second second second and second sec

#### **Reflecting** society

Reflecting society CAMBRIDGE, MASS. Recently radicals have been criticizing American universities by pointing to the heavy finan-cial backing by the government and the military establishment, and the military establishment, and the prosecution of American foreign policy (for ex-ample, Michael Klare's article in the Feb. 4 GUARDLAN, some thinking in the Students for a Democratic Society, etc.). This criticism generally implies that the close relationship between government, business, and the universities is basically a per-version of the normal or tradi-tional goals of the university, and marks a departure from some previous golden see of academia.

and marks a departure hour some previous golden sage of academia. I think it would be more real-istic to admit that universities have never been and probably should not be isolated ivory towers, and that the university of the source of the source of the stitution which reflects that so-ciety and tends to preserve and perpetuate its needs and values. Thus the research and teaching current in American universities accurately reflect what is wrong in American policy, domestic as well as foreign. This reflection exists in all fields, non-scientific or scientific, and in fact the at-mosphere of the American status que affects the general style and quality of all life in the university environment. Presumably medical research would take precedence over weapons research in a better society, and room would also be made within the university and the society for the kinds of radi-cal thinking, investigation, and creating that now go unsupport-ed, if not attacked, by the Amer-ican Way of Life. The problem, once again, is how to get from here to that better society; com-bating the involvement (open or covert) of the universities with government and business must be seen within this context. ## Meeting La Pasionaria

Meeting La Pasionaria NEW YORK, N.Y. Congratulations to Alvah Bes-sie for his excellent review of They Shall Not Pass, by Dolores Darruri, La Pasionaria. I read the book in its Spanish original published in 1963. I met La Pasionaria in 1964 during my last trip to Cuba. It was my first day in Havana and her last there. She had been visiting the island as a guest of the revolutionary gooverment. I was introduced to her at a fare-well reception in the Casa de las Américas. As Mr. Bessie un-doubtedly knows, Northern Span-iards are often amused by an Andalusian accent. Dofa Dolo-res reacted to mine and im-mediately asked which was my

**REPORT TO READERS** 

Ferrie had been questioned by the District At-torney's office a few days after the assassination, on his circuitous route back to New Orleans from a most unusual "goose hunting" trip to Texas with two other men undertaken the day Ken-nedy was murdered. Ferrie had been given a "clean bill" by the FBL but there are 56 pages of testi-mony about him in the mass of material produced by the Warren inquiry, 40 of which are barred to the public in the National Archives in Washington.

FERRIE WAS KNOWN to be a rabid anti-Castroite and to have said that Kennedy "ought to be shot" for bungling the Bay of Pigs operation in 1961. He is known to have been associated with important Cubans in the exile movement in New Orleans, among them one man in par-ticular who moved from New Orleans to Dallas before the assassination, and who has been fre-quently mentioned in connection with the as-sassination. At various times Ferrie said he had been involved in the Bay of Pigs fiasco and was reported by New Orleans witnesses to have flown several times to Cuba; but he told a Washington

Post reporter that he had never been in Cuba. There are discrepancies in the motel re-

(There were also con-flicting police reports that Ferrie and Oswald had been picked up together in 1963.)

ON THE MORNING OF FEB. 23, about 11 o'clock, UN THE MUKAING UF FEE. 23, about 11 0'clock, Perrie was found dead in his bed. Even in death the contradictions followed. Garrison said that Ferrie had killed himself. The coroner, after reading a paragraph from a letter left by Ferrie which sounded much like a suicide note the re-fused to read more them one semicase, and that fused to read more than one sentence), said that Ferrie had died of a ruptured blood vessel in his brain-a natural cause. The coroner put the time of death sometime the previous night. When a Washington Post reporter disclosed that he had been with Ferrie from 11 o'clock the pre-vious night to 4 a.m. Feb. 23, the coroner de-cided that the death could have been after 4 a.m. In any case, he said, it was of no consequence.

In his bachelor room, cluttered beyond belief, were scores of books, articles, charts and dia-grams concerning the assassination of Kennedy. Garrison said that the newspaper disclosures and the death of Ferrie had set back his in-vestigation considerably. His comments released another barrage of derisive press comment. But whatever else it accomplished, Ferrie's departure added another name to the growing list of un-explained deaths of persons involved in the as-sassination investigation. Here is an incomplete list:
