"What the Tapes Reveal: Nixon Hid Truth." "Last April 29, in a dramatic television address, President Nixon announced that he was making public transcripts of his Watergate conversations. 'Everything that is relevant is included,' Mr. Nixon said. 'As far as what the President personally knew and did with regard to Watergate and the cover-up is concerned, these materials - together with those already made available - will tell it all.'" Story gives examples of "dozens of incriminating passages" eliminated from the edited transcripts.

Panel of tape experts - The four tapes played in court today are the final ones of a total of 28. One of those in the audience today is Mark Weiss, a member of the panel appointed by Sirica 21 Nov 73 to study the 18½ minute gap in tape of 20 Jun 72. "Mr. Weiss listened to the tapes intently. Then, when they were finished, he walked from the courtroom with a slight smile. Asked why he was there, he replied, 'I'm just here for the show,' and hurried off."
