Nixon (Senate Select Committee on Intelligence Operations) - Sen. Frank Church, chairman of the committee, says it will attempt to question Nixon about the Huston plan "and any other illegal activities of the CIA during the time that he served as President."

WXP: "According to informed sources, a Nixon deposition was sought by the staff of the Rockefeller commission during its recent investigation of CIA domestic operations, but the former President rejected the request. Unlike the Church committee, the Rockefeller commission had no subpoena power."
