Agnew Leaks Protested

AUG 16 1973

Washington

The American Civil Liberties Union has called upon Attorney General Elliot L. Richardson to stop the leaks of information to the press concerning the investigation of Vice President Spiro Ag-

new.

Charles W. Morgan Jr., director of the ACLU's national office, said that a review of the newspaper articles suggests that information going well beyond the guidelines of the ACLU has appeared in the press.

"The release of this information raises serious questions about the due process being accorded the vice president and the others whose names have been mentioned," Morgan wrote.
