

## **ABA Chief Urges Full Nixon Probe**

Akron, Ohio

American Bar Association president Chesterfield H. Smith called on the House Judiciary Committee yesterday to hold a full and comprehensive investigation of whether President Nixon should be impeached.

Smith, speaking at the dedication of Akron University's \$2.2 million C. Blake McDowell Law Center also said the major issue that has emerged from the Watergate incident is the President's credibility. He said constitutional issues of separation of powers and executive privilege are now subordinate points.

"We must, as a profession, not be satisfied with the Watergate mentality which says that if our motives are good we can do any outrageous and dishonest act to accomplish them," Smith said.

"We must spend every effort to condemn and to eliminate unethical practices from the legal profession—and from the community and from society as a whole.
