

Poll Finds Support for Press as an Adversary to Government

BY MARTIN ARNOLD

A confidential Gallup poll per cent partly agreed. Eight indicates that the public supports the press's adversary role in dealing with the Government and that a majority believe that the Government tries to keep too many secrets. The poll, taken for news papers that subscribe to the background agreed and 30 per regular Gallup Poll, also reports that 62 per cent of those questioned agreed that news reporters should be protected from being forced to disclose confidential sources—an increase of 5 percentage points over a similar Gallup poll in December, 1972, before the bulk of the Watergate disclosures. The latest poll was taken in October, 1973.

On the other hand, according to the new poll, 40 per cent of those questioned agreed with the criticism that "news papers often make innocent persons look guilty before they are tried in court," and 37 per cent more partly agreed. Nine per cent definitely disagreed, and 1 per cent gave no answer.

Too Much 'Wrong?'

According to the poll, much of the public also agreed that the Administration is opposed to what was wrong with America and not enough to what was right. Thirty-nine per cent of all respondents ac-

cepted that proposition, and 37 per cent definitely disagreed, 14 per cent partly disagreed and 2 per cent gave no answer. The figures changed slightly by educational background. The figures changed slightly to agree. The question was:

"Will you tell me whether you definitely agree, partly agree, partly disagree, or definitely disagree with this criticism (of newspapers in general)? " Newspapers are not careful about getting "are not careful about getting their facts straight." For instance, 26 per cent of all polled definitely agreed that news papers were not careful enough and 41 per cent partly agreed, while only 9 per cent definitely disagreed with the proposition. To further confuse the issue, the public is nearly exactly split over whether newspapers do a good job in presenting both sides of controversial issues, and whether newspapers tend to stress news that favors the liberal side.

Assessment Difficult

The total poll results make it difficult, according to observers, to assess the impact that the Nixon Administration's attacks on the press have had on the public. For instance, Gallup question was:

"In general, how would you rate the job done by the newspapers you read in pre-

senting both sides of con-

troversial issues—excellent, good, only fair, or poor?" The responses:

"The Government does advance the thesis that newspapers are not careful about getting their facts correct, and the public tends to agree. The question was:

"Will you tell me whether you definitely agree, partly agree, partly disagree, or definitely disagree with this criticism (of newspapers in general)? " Newspapers are not careful about getting their facts straight." The responses were:

Definitely Agree	Partly Agree	Partly Disagree	Definitely Disagree	No Answer
All respondents	26%	41%	21%	33%
College background	32%	42%	20%	11%
High school	22%	42%	23%	11%
