

SF Examiner
Julie reported better

FEB 17 1974

Julie Nixon Eisenhower, reported "feeling much better," got out of bed yesterday and took a stroll in a hospital corridor.

Dr. William Lukash, the White House physician attending Mrs. Eisenhower, said the President's daughter was in fine postoperative condition and had less discomfort.

Mrs. Eisenhower went off her liquid diet yesterday, having her first solid food since her operation Thursday afternoon for removal of bleeding ovarian cyst.
