# Data Sought From Nixon

Special to The New York Times

WASHINGTON, April 18—Following is a description of evidence being sought from President Nixon in separate subpoenas issued by the House Judiciary Committee, Judge John J. Sirica of the United States District Court and the Senate Watergate Committee:

**Judiciary Committee**—The House panel voted last week to give the President until April 25 to supply tape recordings of 42 conversations between Mr. Nixon and six Administration officials in February, March and April of 1973. All of the conversations took place during the period in which, according to sworn testimony of some participants, the President was being informed by aides of White House involvement in the Watergate cover-up attempt. The recordings could show whether or not Mr. Nixon knew of or joined in the alleged conspiracy to obstruct justice.

**District Court**—Judge Sirica signed an order today, at the request of the Watergate special prosecutor, Leon Jaworski, giving the President until May 2 to supply tape recordings and documents relating to 64 conversations between Mr. Nixon and four former aides between June, 1972, and June, 1973. All of the conversations bear on the actions of the seven former White House and Nixon reelection campaign officials who were indicted March 1 on charges that they took part in or lied about the alleged cover-up conspiracy. The recordings are being sought by Mr. Jaworski for use in the criminal trial of the seven that is scheduled to begin on Sept. 9.

Of the 64 conversations sought by the prosecutor, 24 were listed in the House Judiciary Committee's subpoena.

**Watergate Committee**—The Senate committee has unsuccessfully sought since last summer the tapes of five conversations between the President and John W. Dean 3d. Judge Gerhard A. Gesell of the United States District Court here dismissed the committee's suit to gain access to the material in February on the ground that the committee's hearings might prejudice the rights of defendants in criminal cases. The committee has appealed the ruling to the United States Court of Appeals. The committee subpoenaed 500 other tapes and documents last December but held off pressing for them in court until the question of the original five tapes was resolved.
