The Pardoner's Tale

SEP 1 1 1974

Has President's Decision Undermined The Faith in His Economic Leadership?

President Ford obviously realized his decision to grant for-mer President Richard M. Nixon

mer President Richard M. Nixon
a "full, free and absolute pardon" for all Federal crimes Mr.
Nixon "committed or many
have committed"
would provoke
Economic some opposition
Analysis and criticism. But
he seems to have
utterly failed to
perceive that it would produce

perceive that it would produce a real shock—even in the busi-ness and investment commu-

Why has it had that stunning effect? And will the fall-out of Mr. Ford's unexepectedly sudden move be inconsequential and brief or serious and long-lecting? lasting?

The reasons for the intitial shock are not hard to understand. President Ford had been moving to put Watergate behind us most effectively by his personal behavior—by the simple and modest style of his speech and deportment from the moment he assumed the Presidency, by his effort to unite the parties and the nation, in by his openness to outside adby his openness to outside ad-vice and criticism (including), from dissenting economists), nand by his apparent realization of the gravity of the economic e

To be sure, there had been doubts about his willingness to act speedily enough to deal with the economic crisis. The stock market had fallen pretty steadily as it refused to accept economic conferences and "summitry" as a substitute for plans and decisions. Yet there was an underlying hope that a clean break had been made with the chaotic handling of economy that had characterized the Nixon era. The White House suddenly seemed to be in House suddenly seemed to be in the charge of a stable and re-sponsible new President who

would, in due course, restore its stability and restore care and responsibility to economic policy making.

Nothing is more crucial to the economic health of the nation than stable and intelligent leadthan stable and intelligent leadership in Washington. As Prof. Otto Eckstein of Harvard said directly to President Ford at the conference of economists in the White House last week:

"The basic rhythm of the American economy, both in terms of employment and in terms of prices has been main.

terms of prices, has been mainly created in Washington. Business has been relatively stable; consumers have behaved pretty predictably. The variations predictably. The variations have originated here. And so the forecaster has to guess

By LEONARD SILK what you and your colleagues will do . . .

No forecaster, economic or political, could have guessed that President Ford, so soon after his first news conference remarks on the question of pardon, would suddenly then pardon the unindicted Mr. Nixon

for crimes unspecified and un-acknowledged—and even go on to consider pardoning all indi-viduals connected with Water-

The political consequences of these events could obviously be grave, for the Republican Party in the coming elections and for Mr. Ford himself in 1976. But what about the economic effects? Since politics and economics are so closely linked, there are grounds for apprehension on several counts.

Energies Diverted

For one thing, the President's ability to focus his attention and energies on complex economic issues could be shattered

nomic issues could be shattered by his involvement in a brawling and divisive political battle. Inevitably, the kind of bipartisan support he might have gathered for difficult economic actions—whether in the areas of the budget, revision of the tax laws; enactment of a national health plan; revival of authority to negotiate interna-

tional trade agreements; measures to deal with the latent, but still very dangerous, energy crisis, and the squeeze of the Organization of Petroleum Exorganization of Petroleum Exporting Countries—could be destroyed if the Democrats concluded that the Nixon era had returned with a vengeance. Actions on all such controversial issues, high on the Congressional agenda, demand trust in the President's values and purposes.

poses.

The President will need the support not only of the Democrats but also of the nation if he is to gain the help of labor, business and other groups for a policy of moderation on wages and prices.

Inflationary Dangers

If the national mood turns cynical once more, with the philosphy of every man—and every interest group—for itself apparently triumphant, the inflationary spiral could be given

another nasty twist.

Thus far, foreign reaction to
Mr. Ford's swift pardon of Mr.

Nixon and consideration of a blown skyhigh, if Mr. Ford blanket pardon for other loses his credibility and the Watergaters seems restrained trust of his political opponents.

Oil Prices Troublesome

This is no small matter in a world that is being whipsawed simultaneously by forces of inflation and recession, with several financial analysis. simultaneously by forces of in-flation and recession, with sev-ere financial problems building up as a result of the unman-ageable price of oil, resulting in huge deficits in the balances of trade and payments of the huge deficits in the balances of trade and payments of the weaker industrial countries, such as Italy and Britain, and of the oil-starved poor countries, such as India and ad Bangladosh. Food shortages are exacerbating the problems of both economic and political instability, and here, too, the United States has a crucial role to play. to play.

Nor can United States's rela-

Nor can United States's relations with the Communist countries be excluded from the area that would be adversely affected by a resumption of domestic political hostility in this country.

domestic political hostility in this country.

The Ford Administration has been seeking to negotiate with Congress a complex plan that would reportedly allow at least 60,000 Jews and others to emigrate annually from the Soviet Union, in exchange for benefits to the Russians in trade with the United States. This delicate compromise plan could now be

reaction to Mr. Nixon's imminent impeachment or resignation lagged, well behind American public opinion, both in intensity and comprehension. Yet a resumed battle over the American Presidency at home would surely undermine Mr. Ford's ability to negotiate and lead internationally.

Nixon Influence Scored

Can Mr. Ford get it back together again? He must move swiftly if he expects to, for his relatively mild critics have started reminding people if Mr. Ford's earlier less lustrous reputation, and his unkindest critical internationally.

Nixon Influence Scored

tration policy.

At this juncture, to paraphrase Mr. Ford, there does not appear to be any quick fix for the political havoc he has wrought by his unexpected pardon of Mr. Nixon and the reports that pardons for former aides and other are being considered, and this is the worst ecnomic news since double-digit inflation and double-digit rates.

The problems of ecnomic pol-

inflation and double-digit rates.

The problems of ecnomic policy making have been thrown back to where they were just before Mr. Nixon's resignation from the Presidency, with the White House at severe odds with a majority in Congress and with Dr. Arthur F. Burns in unchallenged authority over monetary policy—albeit a policy of a little more ease in the light of worsening recessionary signals. Congress may soon be seeking once more to assert some economic leadership, but it remains organizationally clumsy and inept. And the nature of the problems of the seeking once more to assert some economic leadership, but it remains organizationally clumsy and inept. And the nature is to the problems of the seeking once more to assert some economic leadership, but it remains organizationally clumsy and inept. And the nature is the seeking once more to assert some economic leadership, but it remains organizationally clumsy and inept.
