Doctor Rules Out Nixon Testimony for 1 to 3 Months

Special to The New York Time

Special to The New York Times By LAWRENCE K. ALTMAN LONG BEACH, Calif., Sept. 30—Former President Richard M. Nixon will not be medically fit to travel to Washington for one to three months to testify in the Watergate cover-up trial, Mr. Nixon's doctors said here today. Mr. Nixon is ex-pected to be discharged from Memorial Hospital Medical Center next weekend. Dr. John C. Lungren, Mr. Nixon's personal physician, said at a news conference that perhaps his patient could give a written deposition in about three weeks after a normal course of convalescence from his phlebitis and pulmonary embolus.

embolus.

Embolus. That course is not fully planned yet, Dr. Lungren said, because Mr. Nixon is sched-uled to undergo a series of di-agnostic tests this week. Dr. Lungren also said he needed time to evaluate how well Mr.

Lungren also said he needed time to evaluate how well Mr. Nixon responds to anticoagu-lant, or blood thinning, treat-ment. "It's my feeling that he is improving," Dr. Laungren said. Mr. Nixon has been sub-poenaed by both the prosecu-tion and the defense in the Wa-tergate cover-up trial that is scheduled to begin tomorrow. But Mr. Nixon is not expected to be called as a witness for several weeks.

several weeks. In answer to a question whether Mr. Nixon was in suf-ficiently good physical condi-tion to withstand the strain of deposition in his hospital room, Dr. Lungren said, "At this time, I don't think he is." Then, when asked how much

longer he expected it would be before Mr. Nixon could provide such testimony, Dr. Lungren re-sponded: "A written deposi-tion—perhaps within a period of two to three weeks, cer-tainly."

of two to three weeks, cer-tainly." Dr. Lundgren said that Mr. Nixon would have to avoid pro-tracted periods of sitting, standing or riding in a car, plane or bus for "at least a month—maybe three months." When pressed for a more precise estimate, he said: "In all honesty, I don't know." He added. "I can't pinpoint the time. I can't do that." Gain for the Doctor

Gain for the Doctor

Dr. Lungren went on that if Mr. Nixon chose to testify, "I can't stop him. That's his de-cision, not mine." But he con-tinued: "I'd be derelict in my duty to him if I suggested that he net observe this restricted

duty to him if I suggested that he net observe this restricted acivity for at least the nexxt three weeks and a lot longer." Mr. Nixon's first bout of phlebitis occurred on a trip to Japan 10 years ago. Then, ear-lier this year, while in the Mid-dle East, Mr. Nixon reported symptoms of swelling and leg pain to his doctors. The symp-toms reportedly began before Mr. Nixon left Washington on the trip.

Mr. Nixon lett wasnington on the trip. Mr. Nixon also went to the Soviet Union though the symp-toms lingered. Mr. Nixon's doc-tors have said that he went on the trip against their advice. Doctors at the time said it was not a good idea for Mr. Nixxon to travel with a phlebitis con-

dition because of the risk of developing a pulmonary embolus.

Mr. Nixon also declined hospitalization when Dr. Lungren said he first recommended it

said he first recommended it for a flare-up of the phlebitis earlier this month. At the news conference, Dr. Lungren said: "I think he's fin-ally adopted the decision that he'd follow everything I told him to do."

him to do." Earlier in the day, Dr. Lun-gran issued a medical bulletin stating that Mr. Nixon was out of his hospital bed and sitting in a reclining chair with his left leg elevated for portions of the day, though he "continues to have marked physical ex-haustion." Dr. Lungren sai dthat Mr.

Dr. Lungren sai dthat Mr.

Nixon's "treatment is proceed-ing satisfactorily" and that he spent the last five and a half had stopped his intravenous heparin while continuing to pre-scribe Coumadin blood-thinning pills. "He will continue to receive the will continue to receive "He will continue to receive of the gist of his remarks were also said that Mr. Nixon had gone 27 Nr. Lungren said. When asked to explain his definition of phy-sical fatigue, Dr. Lungren said that Mr. Nixon had gone 27 Nixon's "treated with heparin last week. "Years in the roughest job in the world, had recurrences of phle-bitis since June and was under going his longest stay in a hos-toring of a yet indeterminate period of time," Dr. Lungren said. He also said that Mr. Nixon had gone 27 Nr. Lungren said. When asked to explain his definition of phy-sical fatigue, Dr. Lungren said that Mr. Nixon had gone 27
