Magruder wrote one. Dean is writing one. And rumor has it Nixon is preparing one. But only veteran Nixon-watcher, Frank Mankiewicz has written the one book that tells not just what happened but *how*. *U.S. v. Richard M. Nixon* is the story of a nation and a people brutalized by "high crimes and misdemeanors" beyond anything in our history. The frightening and almost unreal story of a President whose base of power was built upon conspiracy, burglary, corruption, wiretapping, dirty tricks, and just plain lying. And the story of how in the end, after being repeatedly prodded by a relentless press and indignant public, the American "system" finally worked. But more than just a recounting of the familiar "horrors" that stunned and paralyzed the nation, Mankiewicz has written an incisive guide to the orderly legal processes which exposed Nixon's lies and ultimately toppled the "imperial" presidency.
