Chinese Spotlight Julie Visit

PEKING—The Chinese media gave unusually lavish attention to the visit of former President Nixon's daughter Julie and her husband David Eisenhower as they went sightseeing in southern China.

A color documentary film of their tour, rushed into distribution was being screened throughout the country, the Chinese press said.

Photographs and reports of the couple's audience here with Chairman Mao Tse-tung dominated the front pages of newspapers, an indication Peking wanted to underline its appreciation for Nixon's role in restoring SinoAmerican relations and to ram home concern about U.S.-Soviet detente.
