

# Pat Nixon Swims

## San Clemente

Former First Lady Pat Nixon swims daily and is "progressing as expected" with her recovery from a partially paralyzing stroke, her doctor said yesterday.

Dr. John C. Lungren said he is sticking by his earlier expectations that Mrs. Nixon will be fully recovered from the stroke by October or November.

"She is walking better but she still has problems with her left hand and arm — but that too is improving," he said.
