

Mark Lane

now dares to ask: Is there a conspiracy between our government and the mass media to conceal facts from the American people?

A Citizen's Dissent

MARK LANE REPLIES

The explosive new book by the author of the #1 best seller **RUSH TO JUDGMENT**

It reads like 1984 — Mark Lane's gripping, fully documented account of how the U.S. Government and the communications industry attempted to suppress his investigation of the Kennedy assassination — and failed!

In a book that penetrates to the heart of today's critical "credibility gap," the man who convinced the majority of Americans that the Warren Commission *could* be wrong reveals how the U.S. Government harassed him (and everyone else who tried to investigate the Kennedy assassination) and how our "free" communications industry withheld information the public was entitled to know.

■ **WHY** was Lane followed and questioned by FBI agents — and why was he held by customs officials when he attempted to re-enter the country after a trip abroad?

■ **WHY**, at a critical time, did mass media — including major radio and TV networks, as well as publishers (and he names them) — refuse to print him

or air him and, in one case, ban him "for life"?

■ **WHY** was Mark Lane's first article questioning Lee Harvey Oswald's guilt as the lone assassin rejected by every "Establishment" newspaper and magazine?

■ **WHAT** threats does Lane regularly face and why did he feel it necessary to abandon the safe, comfortable life of State Legislator and distinguished lawyer for the lonely, vulnerable road of a dissenter?

These are some of the questions Mark Lane explores in *A CITIZEN'S DISSENT* — the shocking story of how "Big Brother" is becoming a reality in America, how an American citizen can be victimized by a "free" press and a "free" government, and how one sufficiently determined man can, virtually alone, stand up to the "Establishment," break through its official "curtain of silence," and bring an urgently important message to the American people.
