LOS ANGELES AF - Sen. Robert F. Kennedy

showed no improvement and remained in

extremely critical condition Wednesday night after

surgeons removed from his brain most of a bullet

police said was fired by a mysterious young

Jordanian.

Senator Kennedy's condition is still described

as extremely critical as to life,'his press

secretary, Frank Mankiewicz, told newsmen.

In Washington, President Johnson went on

national television to denounce the assassination

attempt.

Let us for God's sake resolve to live

the law,'s the President said in a brief but

impassioned address. We cannot sanction the

appeal to violence.'

Johnson then appointed a commission to

investigate the phenomenon of violence in America.

As newsmen kept vigil in Good Samaritan

Hospita., Mankiewicz reported - 12 hors after the

delicate brain surgery on Kennedy - that

team of physicians attending Sen. Robert

Kennedy is concerned over his continuing

failure to show improvement during the

poast-operative period.'
