

### CUBA SCORES PRESS OF U.S. ON OUSTERS

Special to The New York Times

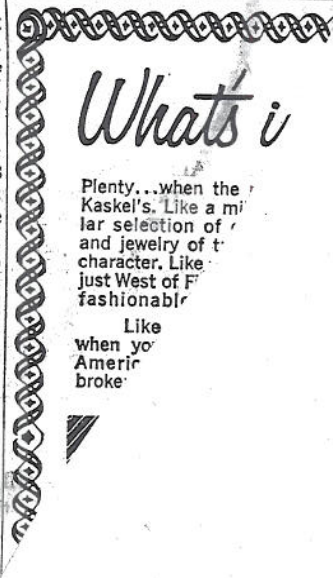

MIAMI, April 11 — The Cuban Government accused "Yankee reactionary newspapers" today of "waging a campaign of provocations against Cuba" aimed at "creating difficulties in the functioning of the Cuban mission at the United Nations."

The charge, made by the official newspaper, Granma, was Cuba's first reaction to reports published last week that the United States Government had denied re-entry visas to two members of the 17-man mission to the United Nations and that five other Cuba diplomats might not be allowed to return the next time they leave the country.

However, the editorial did directly deny the reported reasons: alleged intelligence activities and "financial and directional" aid to the Black Panther party, a militant group.

Referring specifically to an

article on April 4 in The Daily News of New York and one in The New York Times the next day reporting the action against the Cuban diplomats, Granma said that "the Yankee newspapers' campaign against Cuba" had been "inspired by the most reactionary circles."
