

Paragraphs below included in comment by Peter Kihss on book by Albert H. Newman, "The Assassination of John F. Kennedy: The Reasons Why."
Filed Misc - Books, misc (Newman).

A 32-page new attack on the Warren findings appears in the current issue of Computers and Automation, a monthly published in Newtonville, Mass. This was written by Richard E. Sprague, an engineer and computer expert, who is president of Personal Data Services, Hartsdale, N.Y.

Mr. Sprague says he has collected more than 200 photographs and looked at 200 more, out of 510 taken before, during or just after the assassination (counting any movie sequence as only a single photograph). He urges computer analyses.

He holds that at least three gunmen and probably four fired six shots at President Kennedy. He contends that Oswald took part in a conspiracy but did no shooting.

His article includes a picture that he interprets as showing a man just after the assassination "with radio in pocket and 'S'-shaped antenna hanging down."
[James Hicks? Willis slide 7, XXI/771. Chron. cards, 28 Jul 67, card 3.]

Mr. Sprague says this man told District Attorney Jim Garrison of New Orleans he was "the radio communicator among the rifle teams." He says that since making such statements the man has been "locked up in an Air Force hospital for the insane" in Oklahoma.
