

## Local Press Conference May Shock The U.S.

**OUT OF MY MIND:** That Trial Lawyers convention at the Sahara this weekend should be a whopper, but if I were you, I'd pay particular attention to that press conference called by Joe Tonahill (Ruby's attorney after Belli) for Saturday morning at 11 a.m.

Although I can get no one to officially confirm, I have reason to believe that Tonahill will drop a few bombs. Some informed sources say that he'll suggest that Oswald may not have died of the gunshot wound inflicted by Jack Ruby, and that he might have been saved with proper care. The other bombshell: Jack Ruby was also a "marked man" and Tonahill may discuss the possibility that Ruby's cancer developed from man - inflicted methods.

Strong charges? You bet, but it's obvious that the next few months will bring some eye opening news to the American public about the murder of John F. Kennedy.

★ ★ ★

**AND SPEAKING** of the above brings to mind the Las Vegas Young Democrats scheduled panel discussion on April 4th at the Flamingo. It's on the Kennedy death and that, too, promises to be a hot one with some prominent national figures already firmed for appearance at the event. Program Chairman Ed Kovacs is in touch with New Orleans DA Jim Garrison who has been invited to join the panel, but has not yet indicated if he will make it. . . I may be a little confused, but I can't understand why when you call information on the telephone, and ask for a listing for McCarran Field, the operator tells you they have no phone. She points out that each airline has its own phone, but none for the airport information. My question: Why is it handled this way? The fact that the airport has no phone is a bit of a mystery.
