## **Bayh Says Hoover Hurt FBI**

BOSTON -- (UPI) -- Sen. Birch Bayh said yesterday FBI Director J. Edgar Hoover damaged the FBI by becoming involved in a political controversy with former Attorney General Ramsey Clark and perhaps should be replaced.

Bay (D-Ind.) said Hoover has "forgotten what his job is and perhaps we ought to find someone who would not be so easily tempted."

Bayh referred to Hoover's attack on Clark as a "jelly fish" who was soft on lawbreakers while serving as attorney general in the Johnson Administration.

"If the FBI is to maintain its reputation and stay out of the give and take of the body politic then its Director cannot permit himself to become involved in this type of a confrontation," Bayh said.
