

WARREN FINDINGS ARE DUE 'IN DAYS'

Report on Kennedy Slaying
May Be Issued Sept. 28

WASHINGTON, Sept. 12 (UPI)—The Warren Commission's report on the assassination of President John F. Kennedy will be sent to the White House "in a matter days," Chief Justice Earl Warren said today.

The report is intended among other things to end rumors and speculation about the assassination. It is expected to be made public by the White House by Sept. 28.

Its major finding is expected to be that Lee Harvey Oswald acted as an individual, not as part of a conspiracy, when he fired the shots that took Mr. Kennedy's life in Dallas last Nov. 22.

It also is expected to conclude that Jack L. Ruby, the Dallas nightclub owner, acted alone when he took revenge on the accused assassin by shooting him dead in the basement of the Dallas Police Station.

The report will deal extensively with numerous rumors that both Oswald and Ruby were acting as part of a conspiracy, variously attributed to extreme right-wingers, extreme leftists, and the Dallas police.

In each case, the rumor will be coupled with a report of a commission investigation that seeks to answer it.

The hard-covered volume to be presented to President Johnson will be bound in navy blue buckram with the Presidential seal embossed in bright gold on the front.

Proofs Being Checked

Mr. Warren said that he and other commission members had been checking proofs of the report returned by the Government Printing Office. He said that the commission staff was working around the clock, and "we're checking thousands of footnotes" against the record of 9½ months of investigation.

"I can't assume that the report will be at the White House next week," Mr. Warren said. "But it would be a good bet. It will be up to the President to determine what use should be made of the report for the public."

Other commission sources said that "you can count on the report's being released by the White House either Sept. 21 or 28." But a White House source mentioned the weekends ending Sept. 28 and Oct. 5.

The principal obstacle to publication at this point appears to be editing. One commission source said that in some cases whole sections were being moved from one part to another part in the report. In other cases, he said, individual words are being changed to convey a more precise meaning.

Some sections, including appendices, already are being printed in final form, a commission source said. Some 20 volumes of testimony taken during the commission's exhaustive investigation have also been printed.
