THE MIDLOTHIAN MIRROR

LETTER TO THE EDITOR

Aug. 4, 1967

Dear Mt. Creek Phil:

We here in New Orleans enjoy your letters to "editar," based on newspapers allegedly slipped by the squirrels—or maybe the bison, the dog-ghosts, or the nutria of Texas. (One lady here keeps complaining about the neutrons in her back yard.)

Enclosed \$4.50 is for renewal (quick, at old price). Only good if you continue that hot trail to the real murderers of Kennedy.

So you're read in 33 states. Good, Hope that means most of them have seen RUSH TO JUDGMENT or read Mark Lane's book. Best film since THE MOUSE THAT ROARED (which ought to be revived, as the threat escalates). Congrats on your aid to the cause of truth and justice, as editar and film star.

However some of your readers may not know what the Johnson grass is, for which your farm is named. They could mistake it for ordinary grass roots—a bad error. Why not give a full description, with drawing? Appearance, habits, eradication methods tried so far, etc. This may be the grass that will overgrow our slums if we don't stop encouraging and creating same, here and around the world.

As ever,
Wally & Liz
