Herewith al there's been thus far on the alleged attempt on Gov. -elect Edwards. Wdwin of La. Assume you'll keep these around to see if it develops into anything. We've not made copies.

I have no reason to believe this was a legimtiate threat. I have filed it under Threats, Edwards, should you ever want it retrieved. From these shories the only possible federal jurisdiction is in the silencer. The threat, the headline and the emphasis in each story, is not a federal crime. What is part of my interest is the emphasis on what is not within his jurisdiction and to his knowledge is not, by Gallinghouse. I went through this when there was the threat of kikky which you know vs. JG and phoned the FBI. They could not have been more explicit:no jurisdiction unless accompanied with extertion attempt. The violation on tesimer silence falls

within the jurisdiction of the Treasury for investigation purposes, not the FBI. It is a wierd assassin who leaves his equipment lying around to be found, but I suppose there are wierd people. HW
