

I do have the NYReview article on the FBI by former agent Wall. This is so you won't go to the trouble of copying. I find myself wondering if he would fee free to say whether critics have received such attention...Some of your Kaplan-Vidal clips are of avlue to the writer who broke and worked up (most of) that story. She has just left. The gentlemen at Ramparts are doing a book on her work, what little they are adding coming through the hole she broke in the ice. She's a great gal. Best MW
