All I can say without violating confidence is that the potential of the Wecht & Co ploy is beginning to dawn on some of those involved and there is great consternation. One has flipped (fol lit). I've spent most of the night trying to prepare Howard for the ultimate ~~disillu~~ disillusionment and to assure him he could not have influence ultimate outcome in any way. The odd thing is that with no barrier of which I know to keep him from seeing this autopsy film and he, without doubt, one of the greats of forensic pathology, hair is pulled ~~from the~~ by the roots and there is a great wailing, "now we are all ruined".

Craziest, non-confidential development is that one of these has written me to say they knew they were stealing my work but consider it legal, proper and required by "good conscience".

Progress report on The Ma Equilization Project, henceforth TMEP: ~~Bill~~ Babbermouth estimate (requires discounting) about 100 square inches, probably back.
