

3/4-I'm going to celebrate the first robin I've seen (three days after first unofficial sighting) but working outside until mail time. I've gone over the Post and include what they have on China. Off first page except for Cormier AP piece I sent, except what I've sent. Note someone saw C and women's lib as I did. I've not taken time to read others...On Kleindienst, I started keeping a file on his because he passed on FOI cases; so if you have not need for what is now in the NYT when overloaded Je gets to the current, I'd appreciate those things. Not urgent, merely potentially valuable, and no need for special mailing. It will be late and will be merely for completion of file. If I had been younger and less tired I'd not have been turned off by Bayh's premature coping out. I now regret I ~~xxx~~ did not do what I would have years ago and taken his record of lying and on FOI to the Democratic members, for they'd have had a means of attacking his truthfulness at a time it was pertinent, when he was on the stand and had no possible defense. I fear it is too late and I'm without the means of making a trip to DC to press the case in person. My old car has 98,000 miles on it and I'm nursing it...If in the future it interests you, I'm keeping a kind of file on the Harrisburg case, but my only probable interest may be in the informant. The Post today says the FBI gave him the dope on explosives, via Army manuals...The Chicago TAF asked for and got equal time on CBS's WBBM Chicago early this a.m. to respond to an editorial praising Nixon on China! Typically, counterproductive approach and appearance. But it is the only think of the kind I've heard I have big plans, for me, for some weekend taping that may interest you.

MAR 7 1972

there is supposed to be a CBC special tonight of which I wrote. It coincides with a NET dramatic thing I want to see. So, I plan to use a 120 cassette and the Sony in the bedroom, where we have a very good all-wave set I used to need to listen to distant stations on which I was due to be broadcast by phone, so I could feed in smoothly. Then we'll listen to that, because we are also interested in it. Then I'll use the other side for the 3rd NET TV show on China, with White, and then I'll send. I think NET is Monday. I'll not need or want back. I will not be giving you back one of the Sony tapes. I'm too cheap for that. But I have a 120 I got in Dallas at the largest electronics store there. They say it is their own brand and good. Probably cheap. By the way, the tapes I got at 50¢ each are called Sterex, are US made, Atlas Films, Inc., NYC, of whom I never heard, but I tested one and it was smooth and clear. I'm going to try and get more this evening for with the BankAmericard I can postpone the unhappy day two months. They don't shake nearly as much as the others, seem to be snugly built. They are not the known cheap brand in the ad, the one with which I have had trouble. H
