

Lamia deal or begins to deal with  
Tai Li and his Secret police and the  
way he ran it, his deals with the  
Jap. on opium, etc., on 86. I do not  
know if this interests you or if you  
already know more than it says. But  
if you are interested, suggest  
checking Marboro out there because  
the cost of copying is greater than  
that of the book. If you can't get  
there or by mail, I'll ask the friend  
who got this for me or I'll lend you  
this copy when I've finished. I am  
at the beginning of this part, so  
aside from know knowing enough about  
any asked or what you know, I can't  
evaluate dependability of what is  
presented as fact. I am reasonably  
confident it is information deV did  
not develop himself, that he was told  
by CIA or found it in French  
government files later in his life.
