

3/20-If the enclosed letters to Howard make no sense or do not interest, forgive me. There are two reasons more than others behind my taking this time: there is a campaign of some kind on vs what I'm trying to do (or prevent) and one of the things I'm not supposed to know is that Burke Marshall has given his word that he will let another (not identified) look at this stuff at a time also not specified.

There is so much here that does not meet the eye. What bflles is that a Marshall could violate the contract to let s Lattimer see the stuff. To give you a new reading on his selection, this entirely confidential direct quote from a recent letter he wrote not knowing he was writing me: "Were you aware of the similarity of A. Hidell and A. Hitler, as an identification of who he admired?"

Still a new kind of Communist, eh? And "expert".

It is, of course, more than enough to have to try to cope with this kind of thing without having to battle the internal stupidities. Only where they can make a difference do I even acknowledge them.

Does it not jar you that such a man, such a mind, is given this role by one supposed to be looking out for the Kennedy family interest? I am not at all certain I have figured the game out. I sure don't want a Sen Fernando replay. H
