

OCT 24 1972

21

Nothing you don't know, but the London Times WG story does show the knowledge imparted in the backgrounding as I am coming to feel the early Post coverage was benefitted by the ability of the reporters to see what they have developed before others saw it, any reporter on any other papers, I believe. Without it they might not or might not until much later.

I have been sent Ramparts 9/72 Richard Plays Realtor in San Clemente; Times 10/15, Turner, Nixon Role in Coast Land Deal Unclear; Times 10 18 Segretti is Linked to Calls in White House in Spring. HW

3M did send me the wrong paper. Arranged for exchange yesterday, but it is not taking about a ^{2'} day per five miles in delivery, something inferior to Pony Express! Because of all their messing up, I may with luck be in better copying shape. If they get in a working junker Thermofax, they'll swap it to me for mine that doesn't work, junk mine, and I'll be able to make cheaper and faster copies on some things...Ribbon-switch level on this thing actually broke. So, when I took it to shop this a.m. I found the one place in town that seems to have felt-tipped pens not encased in plastic. I could open and test. They have the Falir, so that problem is not solved. I don't know if it will interest you, but they had a display of finer-writing pens, Bic "Banana" in an assortment of colors, the orange being close to the yellow. This has the advantage of beginning with and I'd think living with a thin line should you have a need for that. It has a steel point and is like a regular ball-point pen. I have no need for it in yellow. They have many colors, perhaps 10. What Je asked be returned in the mailing that came today is in 3cl. L, next to go.
