9/15 Lavell transcripts released today, to date. They will be "corrected" before printing, Probably typescripts released as turned in by court reporters . Committee or Senator can provide, but with some cost and more reluctance than printed hearings. If you are not concerned about editing, which with honest editor will not change sense (but with that committee this may assume too much), write committee or Senator now and ask for complete hearings when printed. They may or may not be available later at Govt Print Office, but if from committee of Seantor, also free. H
