Dear Mr. Heisberg,

I've been wanting to write this letter since I read your two books several months ago, Whitewash I & II, but I never seemed to sit down and do it, but I finally decided to take time and write you a letter.

I found the books to be exciting and very interesting to me as I have always been skeptical of the assassination since that day. I liked your thoroughness of research into the Warren Commissions 26 Volumes. I have read other books on the subject but only with yours is it shown to myself and others who have them the complete corruption and whitewash of the investigation of President Kennedy's murder and the big lie that is perpetuated.

Three years have passed since that day, I wonder if there has been any new information that has come to light through your investigation

that you could personally share with me?
Do you feel or rather believe President Nixon or any
future President will ever reopen the investigation?
And even assuming they were furnished with more evidence
(God knows they have enough!) would there ever
be a reopening?

I have been checking your books out of the library
for myself and for others where I work and they also were
impressed as I, the things we didn't know! I am
interested in owning the two books, *Whitewash I & II*
for present and future readings. Do you know
where I may obtain them? Any information you can
supply me with to help me obtain them would be
greatly appreciated by me. I hope to pass them
on to my children.

In closing I just want to say that with
all the lies that have been printed about
the assassination on November 22, 1963 I feel
that your books are a real powerhouse
of truth. Really great books!

Very truly yours,
James E. Tilley
