JAN 1 9 1973 Inaugural 'iolence HW 1/19/73 Bearing on my suggestimn that the situation is ideal for the creation of violence and its values to Nixon and the Watergators, in his appearance on CBS TV a.m. news 1/18, Jeb Magruder was real Orwellian on this. He forecast it, charged that the protesting Members would be responsible, called upon some he named to see to it that there would be none, for all the world, as thought it was planned and certain, and even named groups he said planned it. This is more than a self-fulfilling prophecy. It is very much as though he were advertising for it, including among the many irresponsibles in right-wing youth groups. To say nothing of new recruits, FBI and other finks, and the remaint of the operation of which the Watergate was part.

JAN 19 19/3

your 1/14 on Chariot of the Gods: You did not give me the wrong impression. The fault was entirely mine. You referred to destruction and I assumed to much in haste, von Daniken was called German by NBC and I think a paper i read, That show has done it. Bantam is already out with a new edition, and our local newsstand has it on the counter by the cash register. I'm glad to have made this mistak because of all the fascinating added detail you supply! I had never thought of the possibility of earth colonization. This would have had to have been much more than 5,000 years ago to have included those animals with the different specias, which had to have time to develop. When one thinks of all the many things of which we in this part of the world know so little that seem to have originated in hina, that it has a running start is pretty obvious. Having it given is the easiest way. I dongt know what the Soviet instruments of measurement are, but if they are no more precise than radioactive carbon testing, that be very close, judging with the work on the ead Sea Scrolls. This kind of mind-opening stuff to which I've never given the slightest thought is a delight. Thanks. Maybe I'm a

bit wiser. ertainly less unquestioning. HW 1/18/73

Thanks for forwarding my letter to Treuhaft (I remembered how it was pronounced, not spelled) and for sending his address. I doubt that what I have in mind could work because there would probably be a question about service by mail. The first basis for getting Bringuier's spurious suit agains me, Saga and Dell thrown out of court was that Louisiana does not remognize mail service. (Saga and I as well as Dell's counsel wanted to go to court rather than get the case killed, by the way, but Dell management wouldn't.)But our situation is so bad-1 have to try almost anything. I've not heard from any of the wholesalers I dunned, JAN 1 9 1973 HW 1/19/73 63
