

There is a basis for believing WB has changed some attitudes toward me. First Jerry Sussman gave me a copy of the full Dean statement, all 245 pages. He was off for a few days, catching up on some rest, but he had left it with his secretary, with the message I could keep it. Then, on my way home, I stopped off at NBC to tell my friend the assignment editor of the coming C.A. spectro hearings. He was leaving a I got there, but we chatted briefly. He is interested but there is no possibility of coverage with WG one. Wants me to call after hearing and (match) would like an exclusive when I get the material. It didn't register when I said the feds will delay for years - and can. What he told me, somewhat apologetically, did interest me, that his bureau chief had told him to maintain contact with it and to keep up with my work. The inference is that said B.C. is impressed with it. (I know he read Frame-Up while flying out to the west coast when it came out.)...Got the Hunt/Buckley tapes back and will be mailing when I can. Tired. Got an early start. Was writing at 5 a.m. and the day was hot....When the Post printed more than three pp of the Dean text, I do find it a bit provocative that they omitted this interesting stuff. One possibility: they are following those particular things...My letter to Bud on the KGO show quoting Tackwood as saying McCord was one of the 99 Dealey Plaza assassins didn't reach him. Best, HW 7/5/73
